

# YaraMila™ UNIK 15

## NPK 15-15-15

### Completeness

Every prill of YaraMila™ contains total N, P, K nutrition.

### Balanced Source of nitrogen

YaraMila™ products include a balance of nitrate and ammonium nitrogen, making the products significantly more effective than urea or ammonium based fertilizers per unit of nitrogen.

### Nutrient release and uptake

YaraMila™ T15 dissolves quickly and evenly when in contact with the soil in humid conditions or after a night's dew. In dry climates, the higher solubility of YaraMila™ T15 products helps nutrients reach the roots where limited soil moisture is available. In tropical climates nutrients move rapidly into the soil, avoiding potential for soil surface run-off due to heavy rain.

### Unique phosphate

Yara's nitrophosphate production process gives YaraMila™ T15 a unique combination of polyphosphates and orthophosphates. These forms give greater availability of soluble phosphate to crops over a wide range of soil types.

### Superior Handling

The YaraMila™ T15 prill is specifically designed to allow easy and accurate spreading by machine or hand.

The information provided is accurate to the best of Yara's knowledge and belief. Any recommendations are meant as a guide and must be adapted to suit local conditions.

### Yara Ghana Limited

Bostal Avenue 2, Roman Ridge, P.O. Box CT 5258, Accra, Ghana  
Tel: +233 21 779 854 / +233 21 770 079 Fax: +233 21 760 208

### Benefits:

- *Balanced Nutrition in every prill*
- *Unique nitrophosphate production process*
- *Balanced nitrogen source*
- *Poly and Orthophosphate content*
- *Rapid nutrient release*
- *Excellent handling and spreading*
- *Low dust in handling*
- *Proven quality*
