Plant nutrition is our specialty

Yara is the world's leading producer of mineral fertilizer. With presence in over 65 countries and over 100 years of quality experience in the fertilizer business, Yara has a legacy of continued success in high crop yield. Our fertilizers are scientifically tailored to suit each crop's nutritional requirements.

In Ghana, we offer programmes to provide technical assistance to farmers. This is aimed at helping them to produce more food for Ghana's growing population.

Balanced nutrition

YaraMila™

Actyva™:

23-10-5+3S+2MgO+0.3Zn

Winner:

15-9-20+S+MgO+Zn+B+Mn

UNIK 15:

15-15-15

Welcome to the world of Yara NPK fertilizers:

- YaraMila products are prilled fertilizers of high solubility.
- They ensure balanced nutrition.
- YaraMila fertilizers do also contain secondary and micronutrients essential for specific crops.
- With these fertilizers the plant's ability to absorb calcium, magnesium and potassium from the soil increases.
- The presence of sulphur increases the rate of metabolism of nitrates.
- YaraMila fertilizers provide a balanced nitrogen source, an easy available phosphate formulation for easier absorption, and ensure efficient nutrient release.

Nitrogen Source

Urea (46% N)

Ammonium Sulphate (21% N)

Give your plants the extra boost they need:

- Urea ensures the rapid growth and development of crops.
- The presence of Sulphur in Ammonium Sulphate enhances the vegetative growth of crops and also helps in the formation of protein.
- Both Urea and Ammonium Sulphate boost the healthy growth of the vegetative parts of plants.
- Urea and Ammonium Sulphate also increase crop yield through energy supply to all parts of the plant.

YaraLiva™

Nitrabor™: 15.4%N,

25.6%CaO, 0.3%B

Overcome problems in crop production for export by using Nitrabor:

- Nitrabor reduces the incidence of internal break down in all fruits.
- It reduces the occurrence of fungus diseases like anthracnose.
- It improves the absorption of potassium, magnesium and calcium.
- It strengthens the development of plant cells.
- Nitrabor increases the shelf life of fruits.
- It eliminates the occurrence of skin cracking in fruits.
- Nitrabor is essential for flower induction and fruit set.

Krista range

Krista K: 13.5%N, 45.5%K₂O

Krista SOP: 52%K₂O, 18%S

Enhance the overall quality of fruits and vegetables with Potassium fertilizers:

- These fertilizers are the preferred source of potassium for high value crops.
- They are important for flower induction in crops.
- They improve the physical properties of fruits and increase their marketability.
- Potassium fertilizers determine the attainment of high sugar content and quality of taste in fruits.
- They increase plant metabolism and its resistance to diseases.

Yara Blends

To get the best crop yield from diverse soil conditions, different Yara fertilizers are combined to provide crops with the right nutritional requirements. The blends are produced depending on a soil/leaf analysis of a particular area/crop. The development stage of the plant and its nutritional requirements also influence the physical composition of the Yara Blends.

Increase Your Yield Today

At Yara we are committed to delivering good returns to you for maximum satisfaction. We believe in giving your crops the right combinations of balanced nutrition at the right time for the best possible yield.

Our trusted global crop knowledge and locally applied expertise continue to build our lasting legacy of repeated success in crop yield.
